

Name	Chen Hanbing
Fundamental information	Birthday 11/28/1995 Address 398, Ruoshui Rd., Suchow, Jiangsu, China Phone number +86 17628131128 e-mail c95@outlook.jp
Education & work experience	Sep, 2014 University of South China, Safety Engineering, admitted Jun, 2018 University of South China, Safety Engineering, graduated Aug, 2018 China Railway Construction Corporation Limited, worked as a safety engineer at a construction site Jun, 2020 looking for higher education, resigned Sep. 2021 University of Science and Technology of China, NANO-Tech and NANO-Bionics Academy, Electronics Science and Technology
Internship	GUSU LAB Research center for intelligent hardware and its application Involved in a research in Infrared low light fusion night vision AR sensing headset
Software skills	MatLab AutoCAD Origin
Experiment skills	Design of optical path and its build Semiconductor-related microfabrication technology
Self-promotion	<p>I believe that I am a person who has the ability to learn, is independent, and acts with determination and prudence in determining my goals. During my school years, I received several scholarships that allowed me to continue my studies without the need for family support. In addition, after deciding that I wanted to work and live in Japan in the future, I improved my Japanese language skills from almost zero to N1 level in 10 months and passed the N2 and N1 exams in stages. In addition, I served as a class committee member and gained organizational skills and management experience by participating in many activities, planning, and coordinating hierarchical relationships.</p>
